Fit-Out & Fixtures

A fit-out refers to the process of designing And constructing the interior of a Commercial space. This can include Everything from installing floors, walls, Ceilings, and lighting to fitting out rooms with fixtures and fittings such as cabinets, Furniture, and appliances.

In a commercial context, a fit-out is Typically carried out when a new Tenant moves into a space, or when an Existing tenant wants to remodel their Space to better suit their needs. A fit-out Can also be carried out to update the Look and functionality of an existing Space or to create a new space entirely.

Office Interior Design

The layout of the office space should be Designed to maximize productivity and Comfort. It's important to consider the Flow of traffic, the placement of desks and Furniture, and the location of amenities Such as restrooms and break areas. Lighting is a crucial factor in creating a Comfortable and productive work Environment. Natural lighting should be Maximized where possible, and artificial Lighting should be strategically placed to Reduce glare and create a pleasant Atmosphere.

A fit-out Can also be carried out to update the Look and functionality of an existing Space or to create a new space entirely.

Architecture Design

Architecture design refers to the process of creating plans and designs for buildings and other structures. The goal of architecture design is to create functional, aesthetically pleasing, and sustainable spaces that meet the needs of the people who use them. The design of a building must also be visually appealing and harmonious with its surroundings. The architect must consider the building's shape, form, materials, colors, and textures to create a pleasing and Memorable design.

Residential Interior

Residential interior design involves the creation of functional, comfortable, and aesthetically pleasing living spaces within a home. The layout of a residential space should be designed to maximize functionality and flow. This includes considering the placement of furniture, appliances, and fixtures to create an efficient and comfortable space. The materials used in a residential space should be durable, easy to clean, and visually appealing. This includes materials for flooring, walls, and countertops, as well as furnishings and accessories.
